The *KEYSTONE* BULK GARDEN SEED MERCHANDISER

Display rack is strongly constructed of punched steel parts welded together, finished in glossy black enamel with an attractive green Keystone at the top. The three shelves provide space for 27 jars, about 500 small seed envelopes and the graduated measuring glass. The rack is 38½ inches high by 41 inches wide and can be used on either floor or counter. The jars are 3½ inches square by 9½ inches tall and hold about 2 pounds of most seeds. Attractive printed green Keystone seed envelopes are furnished free upon request with seed orders. A simple chart showing volume per ounce and per pound of various seeds, together with the measuring glass makes small sales easily handled.

Alfalfa, clovers, soy beans, vetches, peas, cowpeas, peanuts and other legumes should always be inoculated with Nitragin. The lack of necessary bacteria in the soil is often the cause of a poor legume crop—a weak start—or a total failure.

SOMETHING DEFINITE

Something definite—a standard—something solid to tie up to. That is the desire of the average American. We like standard things because standards save us a lot of time and worry. Once we've found a standard we go ahead on it; our mind is freed for other decisions.

That's the reason for the Keystone Dealers Sign. It brings business to the dealer because it represents an accepted standard, a dependable known quality. It says to thousands of gardeners and farmers, "Buy your Seeds here; don't worry about quality, that's been proven for years and years."

Put up a Keystone Dealer Sign.

It's a good-looking enamel steel sign that will bring you business. Send for your Sign—it's waiting for you. We'll be glad to pay the express charges.
